FARM RESIDENCE PREY TO FLAMES

DUGUID HOME BURNS IN MID-
DAY; NEIGHBORS ASSIST
IN SAVING EFFECTS

First discovered in the basement, fire, on Saturday noon, totally destroyed the home of Mr. and Mrs. D. Duguid. Saturday, Mr. Duguid, who had been working on the farm, noticed the blaze and attempted to remove some of the possessions. Neighbors hurriedly came to his assistance, and succeeded in saving some of the furniture. Nothing, however, which burned completely down. Considerable furniture and clothing was also lost. No insurance was carried. Mr. Duguid had been burning off grass in a nearby field, preparatory to plowing, but it is not known whether a spark from this, or defective wiring, was cause of the blaze.

Cooking School in Abbotsford

Conducted by one of Canada's most outstanding home economists, Dorothy H. Baxter, B. H. S., Home Service director of Moffats Limited in Toronto, and sponsored by the B. C. Electric Railway Co. Ltd., a free cooking school will be held in the Abbotsford Theatre at 2 p.m. on Monday March 15.

Miss Baxter has planned an interesting program including methods of cooking oven dinners, meats and vegetables, and some delicious desserts. During the session an open discussion will be held, when you can ask questions, offer suggestions and discuss in general the subject of successful cooking.

This is a splendid opportunity for housewives of this district to obtain the most up-to-date methods in electric cooking, and a fund of the latest recipes. Valuable attendance prizes will be drawn for at the class.

SUMAS-MATSQUI COW-TESTING ASSOCIATION

The following herds averaged 30 lbs. or over of butterfat for the month of February, 1937:

Herds of 16 Cows or Less

W. J. Beharrell (H) 1163 23.5

Gowing Frost

—the Farmers' Auctioneer, says:

"Get Gowing Frost when you want to sell."

Selling! Still Selling!! Always Selling!!!

Two cracking good Auction Sales last week. Big Crowds, Big Prices and Big Results. We get you the Results. That's our job.

Do you know we are headquarters here for the Massey-Harris Famous Farm Machinery, Repairs and Parts?

New Display Rooms to be erected this Spring. See us for New Tractors, Seeders, Discs, Plows, Harrows or any kind of New Farm Implements. We handle them all and they are surely good, too.

Sure—we'll take your old ones as part payment or we will trade you for Hay, Straw, Oats, Harness, Tools, Furniture or anything that's saleable.

MR. F. R. BOOTH, Optometrist

—will be at—

Black's Drug Store

SATURDAY, MARCH 20; 2.30-9.00

Please Phone 104 for appointment

CLAYBURN

Applications are being received for assistance under the "settlers' agreement" arranged between the Dominion and provincial governments. The purpose of the agreement is to assist farmers now on relief to clear sufficient land or acquire additional stock so that they will be able to subsist off their farms and not be dependent to any great extent on outside employment. While intended to be a measure for assisting farmers who have been obliged to apply for relief, it is not being confined to that scope. It is realized that farmers who have not applied for relief may be equally in need of assistance; consequently applications are being accepted from farmers in that category. Information relative to this matter may be obtained from the provincial relief officer at the courthouse, New Westminster.

Mrs. Shore Heads Hospital W.A.

The annual meeting of the Ladies' Auxiliary of the M. S. A. Hospital was held Tuesday afternoon at the hospital. The following officers were elected for the coming year: President, Mrs. Shore; 1st vice-president, Mrs. E. Clark; 2nd vice-president, Mrs. Parton; secretary, Mrs. Wainwright; treasurer, Mrs. R. Gilmore.

Two members Mrs. O. W. Benedict and Mrs. Mayne were added to the executive. Mrs. E. Clark, Mrs. Parton and Miss Archibald were appointed as the buying committee.

Abbotsford Ladies Meet City Shuttles

A team of eight ladies from the Abbotsford Badminton Club journeyed to Vancouver on Monday evening, and played a match against an "A" team of ladies at the Vancouver Lawn Tennis and Badminton Club courts. Abbotsford lost, but only after close, hard games, four of which went to points. It was first planned to play the Vancouver Club "B" ladies, but the "A" came on instead. Mrs. Patrick and Vess O'Shea, Dominion title holders, play for this team, but were not present against the Abbotsford players.

Mrs. J. Parton spent several days in Vancouver as guest of her daughter.

Abbotsford "A" junior badminton team defeated Sardis "A" team at Sardis last week. The Sardis "B" team, however, beat the Abbotsford "B" team in a tourney played here.

In the Matter of the Estate of JOHN MURPHY, Deceased, late of Huntingdon, B.C., and Harrison Lake, B.C.

TAKE NOTICE that I, the undersigned was on the 28th day of November, A.D. 1936, appointed Administrator of the Estate of John Murphy, deceased, late of Huntingdon, and Harrison Lake, British Columbia, and all claims against the said Estate ARE HEREBY REQUIRED to furnish same properly verified to me on or before the 13th day of March, A.D. 1937, after which date claims filed may be paid without reference to any claims of which I then had no knowledge.

DATED this 3rd day of March, A. D. 1937.

JOHN S. MURPHY,

Administrator

Huntingdon, B.C.

Over 1500 Crowd P. Sheffield Auditorium To Capacity To See Local Talent Perform

"If Abbotsford had as many residents as there are spectators here tonight," opined a male voice at the local amateur night, in the Philip Sheffield Memorial auditorium, March 4th, "it would be quite a town!"

Perhaps that was as good a way as any to describe the crowd of nearly 1500 which packed the auditorium to such overflowing that, in one particular instance, they broke a pane of glass on the front door in their effort to enter the hall ahead of the rest of the lengthy queue which had formed long before the start of the performance.

After Harvey Henderson's Carmenians opened the program with the National Anthem, well over twenty diversified numbers were presented in quick succession by local and out-of-town performers, all of them enthusiastically received by the audience even though many of the latter had to stand for the entire two-and-a-half hours that the "Night" lasted.

While dancing, singing, recitations, comic skits, imitations, and the playing of various musical instruments occupied the major part of the interesting display of amateur talent, the climax of the evening was undoubtedly reached when a troupe of Vancouver Recreation Centre instructors and assistants, led by the Provincial chief instructor, Mr. Jerry Mathisen, gave a thrilling exhibition of partner tumbling and high box vaulting, which was especially enhanced by the comic antics of Mr. Ernie Grant, supervisor of Vancouver playgrounds, who seemed to enjoy the "horseplay" as much as the front-row kiddies themselves.

Director of recreational and physical education for the Province, Mr. Ian Eisenhardt, briefly addressed the gathering in optimistic vein during

the earlier part of the program, paying particular tribute to the educational work of Dr. William Plenderleith in this area, while Mrs. Eisenhardt graciously presented the prizes at the conclusion of the evening to the nine acts adjudged by Miss Florence Robertson, as follows:

First prize for the funniest number was won by "Gymn Skit" enacted by Mr. and Mrs. F. Sterling, Misses R. Ralston, J. McLeod, N. McPhee, G. York, M. de Vries and Mr. H. Walker. A monologue by Guy Jones of Straitmont entitled "Caroline's Comfort Call" was awarded second prize, while an excellent impersonation of an inebriate posting a letter, by F. Sterling, won third place.

In the most original section an imitation of a radio broadcast, done by pupils of Matsqui school won first honors. The young people taking part were Victor Hansen, George Seldon, Alan Crist, Ken and Yoshio Sugimura, V. Crist, E. Lehman, D. Hansen; a recitation "Maggie" by Dorothy Duark, came second; mouth organ solo by Joe Vincent won third place.

Most polished performance was adjudged a Russian ballet dance by Miss B. McLeod of New Westminster; two little tap dancers, Lilace Lind and Betty Hay, came second, and a tap dance by Kay Webster and Effie Roberts, third.

Others who took part in the amateur performances included Audrey Gleeson, Jimmy Grant, Jimmy McPhee, Walter Ross, A. Stradlotti, Peggy Anderson, Phyllis McNally, M. Greyley, Sid Wright, Gerald Amos, "Curly" Carmichael and Earl Roberts.

Miss McLeod, of the Abbotsford public school staff, beautifully sang two numbers during the programme.

In charge of the arrangements was Instructor Paul Kozoolin, who announced the acts by means of a public address system.

FREIGHT CARRIERS BENEFIT UNDER AMENDMENTS TO ACT

Drivers of freight trucks in this province who have found existing rules and license fees excessive, will find benefits in the recent amendments to the Highway Act.

The change of most interest and benefit will relieve operators of the necessity of carrying insurance, by waiving proof of financial responsibility to applicants for license of this kind. Henceforth freight carriers will come under the same rules as the ordinary private cars, for which the owner is forced to take out insurance only after an accident in which he was to blame. Up to this time proof of financial responsibility has been required for freight carriers.

Under another amendment, special permits may be granted for the carrying of school children in school buses to concerts or other functions. The scale of public carriers' license fees has been simplified, and licensees may now be paid for part-year periods, by the ordinary monthly reduction of one-twelfth, with a minimum license period of three months.

NOTICE

Dr. J. Lukas wishes to announce that he will be absent from his office all day Saturday, March 13. Phone 107 for convenient appointment.

ROADS IN DISTRICT IN FAIR CONDITION AFTER THAW

Despite the hard frosts and sustained wintry weather during January and February, roads in the district are in surprisingly good condition. Load limits imposed and requests for cars to keep off the side roads as much as possible have enabled the roadbeds to settle firmly after the thaw, and now traffic is back to normal. "Co-operation of motorists and farmers in keeping traffic off the roads while the frost came out of the ground, has saved the municipality hundreds of dollars," states Matsqui municipal clerk, Jack Pennington.

Where traffic was of necessity heavy, the roads did break through, but in most cases this has already been remedied.

Mission, Matsqui, Langley and Maple Ridge municipalities are being asked to contribute to the cost of sending a delegate to Ottawa to protest against trap licenses being issued in this province and the re-opening of fish traps in the Gulf of Georgia. The Upper Fraser Fishermen's Protective Association is making the protest.

Dr. Lukas will attend the annual convention of B.C. Dentists, to be held in Vancouver on Saturday.

ABBOTSFORD

Miss Enid Woods of Vancouver spent the week-end at her home here. Mrs. Sukkau of Poplar is a patient in the local hospital.

Miss Naomi McPhee was the winner of a comforter recently raffled by the ladies of the Royal Purple.

Mrs. Q. Tessaro is progressing favorably after undergoing a major operation in the Sumas Hospital.

Men's "A" cribbage team defeated the Ladies "A" team on Monday evening, by a score of 20-16.

Mr. and Mrs. P. Gouraud and son of Vancouver visited at the home of Mrs. M. Moret over the week-end.

Mrs. Chapman is in Vancouver, attending her mother, Mrs. T. Taylor who is seriously ill.

Mrs. Leslie Berry of Abbotsford, who recently underwent a major operation in the Sumas Hospital, has returned to her home.

Mr. Ecclestone-McKay of Vancouver visited with his son-in-law and daughter, Mr. and Mrs. D. Benedict last week.

Mr. R. DesMazes is visiting Mrs. DesMazes, who is a patient at the Tranquille Sanatorium. Mrs. DesMazes is reported greatly improved in health.

Guests of Mr. and Mrs. John Nyström last week were their son and daughter-in-law, Mr. and Mrs. A. Nyström of Sedro-Wolley.

Plans are already being gotten underway for the 25th annual celebration of May Day in Abbotsford, by the members of the L. T. B. lodge No. 244.

Visitors at the home of Mr. and Mrs. J. Rowley over the week-end were the latter's sister, Mrs. Bushnell and friends of Seattle, Wash.

Mr. Slim Webb, who recently returned from a recuperating holiday in California is back at work, in good health.

Visitors at the home of Mr. and Mrs. F. Moret on Sunday were the latter's sister and brother-in-law, Mr. and Mrs. E. Nelson and family of Mt. Vernon, Wash.

Mr. and Mrs. H. Shafer of Coulee Dam, Wash., are visiting at the home of the latter's mother, Mrs. B. Nelson. Mr. Shafer was for some time manager of the Safeway Store here.

Dog licenses are now obtainable at the local police station. Owners who delay in getting licenses and tagging their dogs are running the risk of having their pets destroyed.

Lee Combs of the Abbotsford Transportation has purchased a new truck for use on his freight hauling runs to Vancouver, ensuring a fast reliable service to people in this district.

Slim Webb has a crew of men clearing and grading property, west end of Essendene avenue, with the expectation of shortly erecting a service station.

Mr. and Mrs. C. Craven who have spent the winter in England, have returned to Abbotsford where they are staying with their brother-in-law and sister, Mr. and Mrs. H. Lambert.

GIFFORD

Miss Martha Westlin is spending a few days visiting friends at Mt. Vernon, Washington.

Little two-year old Sylvia Westlin sustained a painful and serious accident Monday when she was kicked on the head by a horse, while she was playing around the barn. She was given immediate attention at the local hospital, and is reported progressing as well as can be expected.

Mr. and Mrs. J. Black are disposing of their herd of dairy cows by sale on Wednesday, March 17th. Mr. and Mrs. Black are planning to leave the district.

ELECTION SCHOOL ADVISORY BOARD

ONE REPRESENTATIVE TO BE
ELECTED FROM EACH PART
OF DISTRICT

Weather and roads having improved considerably, it has been decided to hold the election of the new Advisory Board of the Matsqui-Sumas-Abbotsford Area on Monday, March 22nd., at 8.00 p. m.

There will be three election centres in Matsqui three in Sumas and one in Abbotsford. Matsqui centre will be Matsqui, Poplar and Bradner. One representative to the board will be elected from each point. In Sumas, representatives will be elected from Huntingdon, Upper Sumas and the Lake Area. Three representatives will be elected from Abbotsford. Members of the present Advisory Board will act as conveners of the election meetings. These conveners will be:

R. Zurovski, Sumas; P. H. Dawson, Huntingdon; Harry Day, Lake Area; J. P. Carr, Bradner; O. H. Heywood, Poplar; A. N. S. Beaton, Matsqui; G. F. Pratt and Mrs. H. Fraser, Abbotsford.

The new board will thus consist of three representatives from each of the former school districts and also of any additional members that the Department of Education considers it advisable to appoint.

Bradner School will be the voting centre for the qualified ratepayers of the districts in the vicinity of the following schools: Aberdeen, Mt. Lehman and Jubilee.

Poplar Community hall will be the voting centre for the qualified ratepayers of the districts in the vicinity of Peardonville, North Poplar schools, Matsqui High School will be the voting centre for the qualified ratepayers of the districts in the vicinity of the following schools: Clayburn, Riddedale and Gifford.

Upper Sumas school will be the voting centre for the qualified ratepayers of the districts in the vicinity of the following schools: Stratton, Kilgord and Upper Sumas.

Huntingdon School will be the voting centre for the qualified ratepayers of the districts in the vicinity of the Huntingdon school.

Abbotsford High School will be the voting centre for the qualified ratepayers of Abbotsford.

All meetings will be held at 8.00 p. m. sharp.

OVER 2,000 NAMES ADDED TO LIST OF VOTERS IN RIDING

Enumerators in this district have added over 2200 names to the list of voters in this riding. As the total number of names on the list at the time of the last provincial election was only approximately 5500, it will readily be seen that there is a great increase.

Those still wishing to get on the list, and who have not been interviewed by the enumerators, may still do so, up till Friday, by getting in touch with Mr. O. W. Benedict.

O. Datwiler, a cattle buyer from Aldergrove, narrowly escaped serious injury on Tuesday afternoon, when his truck left the Sumas highway, near W. Moore's farm, and ran into the deep ditch on the side of the road. Datwiler escaped with minor cuts and bruises, and the truck was not badly damaged.

Miss Frances Allen of Vancouver visited

The Constitutional Problem

Whatever politicians on any party front may think or say on the subject, the people of the country and certainly those of Western Canada must have come to the conclusion by this time that some changes in the constitution are necessary in the light of recent decisions of the Privy Council on questions referred to them as to the validity of Canadian social and marketing legislation.

While on the surface the respective rights of the Federal parliament or provincial legislatures to enact legislation of this character involved in these rulings of the court of last resort, the question goes deeper than that, now that Canada has emerged from swaddling clothes and has assumed the status of nationhood.

Taking it for granted that the people of this country should have the legal right to implement in legislation any plans or policies the majority may desire to impose, there is one school of thought which contends that this end should be achieved by securing amendments to the British North America Act from the British Parliament, while another group is of the opinion that the Act should be abrogated, leaving the way open to the major government of this country to draft and enact its own constitution.

The greater part of a century has rolled around since the passage of the British North America Act, allocating responsibilities and legislative jurisdiction as between the Dominion parliament and the provincial assemblies at the time of Confederation. Since that time there have not only been great changes in the condition of the country, but also in the legislative needs and aspirations of the governed as well as in the status of the Dominion in its relationship to the Mother country and the Empire.

Among these changes in needs and desires is a marked trend in the direction of increasing governmental administration of social services, whether by the Dominion or the provinces. It is true there are those who dislike this trend but, nevertheless, if a majority of the people demand governmental administration or control of such services, a constitution written seventy years ago when circumstances were very different, should not be allowed to block the pathway.

That the necessity for revision of authority in some form exists and that the British Parliament is not likely to stand in the way of the desires of the Canadian people for greater elasticity in shaping their own course, is evident from the comment of the London Times immediately after the Privy Council decisions were published, when this authoritative organ of British public opinion said:

"Now that it is definitely established how narrow are the limits restricting the authority of the Dominion Parliament, it is for the statesmen and people of Canada to determine what extensions are necessary. All parties are agreed there must be some redistribution of powers between the Dominion and the provinces, but difficulties arise as soon as any attempt is made to work out a new division or even settle the method of amendment."

The Times also points out that "as the constitution now stands the Dominion Parliament has no authority to legislate on industrial or social questions or regulate marketing in any general way; which means that until the constitution is amended the national government and Parliament of Canada are precluded from dealing with matters of increasingly great and urgent national importance."

As the situation now stands it appears not only desirable but imperative that no time be lost in dealing with this highly important question, and it should be dealt with in such a manner that in future when the country has made up its mind that legislation of any type is needful and desirable there will be no legal barriers to render it impotent, provided it is properly drawn.

The matter is of too great import to the future welfare of the country to be made the subject of political capitalization and it is imperative that the subject be approached by all political parties in a non-partisan way with a single eye to the country's needs.

The desired result could undoubtedly be best achieved by a conference of Dominion and provincial authorities devoted solely to the constitutional question. Such conference should be as representative as it is possible to make it. Principles which can be accorded support as nearly as possible to unanimity by all sections of the Dominion should be laid down and agreed upon and methods to be adopted to implement those decisions should be the subject of mutual agreement.

If a satisfactory program of this nature be carried to its ultimate conclusion and the problem approached in the right spirit, existing difficulties should be solved without dissension from within or objection from without the Dominion.

There are twice as many automobile drivers in the United States as there are automobiles.

How To Overcome Piles And Rectal Soreness

If you are annoyed with itching piles or rectal soreness, do not neglect the same or run the risk of an operation. Any itching, soreness or painful passage of stool, is nature's warning and proper treatment should be secured at once. For this purpose get from any drugstore a package of Hemoroid and use as directed. This formula, which is used internally, quickly relieves the itching and soreness and aids in healing the sore, tender spots. Hemoroid is a physician's prescription and is highly recommended. It is easy to use and it seems the height of folly for anyone to risk an operation when a simple remedy, which is so pleasant to use may be at such a reasonable cost.

Average Is High

"A dish of tea" would be no treat for Nepal Chandra Bhattacharji, Calcutta, India, who has consumed more than 300,000 cups of tea in the last 30 years, his daily average being about 30 cups.

The longest railway platform in England is to be found in Manchester. It is at the Victoria and Exchange station, 2,194 feet in length.

"Man is falling behind the machine," declares a sociologist. Well, that's better than falling in front of it.

Prairie Changes

Interesting Information Revealed From The 1936 Census

The 1936 quinquennial census of the Prairie Provinces of Canada reveals many changes since 1931. According to preliminary figures, at June 1, 1936, the population of Manitoba was 711,000, Saskatchewan 931,000, and Alberta 772,000. Manitoba shows an increase of 10,861 since 1931, Saskatchewan an increase of 9,215 and Alberta an increase of 40,395. While the population of the three Prairie Provinces as a whole shows an increase of 2.5 per cent., a noteworthy feature is that in the six electoral districts covering their northernmost parts the number of inhabitants has grown from 237,063 to 282,826, a gain of nearly 17 per cent.

This northward movement of population is mainly attributed to three factors: the taking up of farm lands in the newer districts by farmers who have given up their old farms in the drought-stricken areas of the more southern sections of the provinces; the development of mining fields in the north; and the business developed by the Hudson Bay Railway and the new northern ocean terminal at Port Churchill.

Many changes in farm routine have also taken place in the Prairie Provinces during the five years since 1931. There are not quite as many acres under crop in Saskatchewan but increases in Manitoba and Alberta almost make up the loss. More of the land is sowed to durum wheat, but considerably less to other kinds, with the result that the total wheat acreage in 1936 was about four per cent. less than in 1931. There are more oats and barley now, and almost twice as much cultivated hay crop.

Adjustments have been made in livestock as well. There are four cows milking now for every three there were, and five hives of bees for every two there used to be. Pig and poultry populations have been reduced by one-quarter, and there are fewer old horses but nearly twice as many young horses.

Famous Old Residence

Bransholme Castle Again Home Of Ducal Family Of Buccleuch

After an interval of 180 years the ducal family of Buccleuch has taken up residence once more at Bransholme Castle, near Hawick, says the News of the World. The Dowager Duchess, mother of the Duchess of Gloucester, is the new occupier, and will have the companionship of her two unmarried sons. Bransholme, or its site, is hoary with age. It was from there that William of Deloraine started on the ride immortalized in "The Lay of the Last Minstrel." In its fortress days it was burned by an Earl of Northumberland, and blown up by an Earl of Surrey. Few houses have a more valuable art collection.

Heads Enlarge

Investigator Finds Cranium Increases In Size After Adult Age

Folks who have smarted under the stinging accusation of getting big-headed had vindication from the Smithsonian Institution.

Conducting tests on persons of at least three generations of United States ancestry, Dr. Ales Hrdlicka, announced he found the length and breadth of the head increases in men and women up to about the middle decades of life.

"Just why and how," he said, "this should continue after adult life is reached will be a point for future determination."

To Last Thousand Years

Manuscript Of Codex Sinaiticus Has Been Repaired And Bound

At the British Museum they have bound the Codex Sinaiticus to last another thousand years. Mr. Cockrell, who undertook the task, has had many difficulties. The vellum leaves made of sheepskin were much torn at the edges. The manuscript was in detached bundles of leaves, with some single ones. The leaves have been mended, the vellum softened, stretched and flattened and the Codex Sinaiticus will now go down the centuries, in two volumes, bound in white goatskin leather, between boards of English oak.

Road Accidents To Children

The London Daily Herald states that one of the root causes of road accidents to children has been found by the British Ministry of Transport and the Board of Education to be due to the natural characteristics of childhood—impulsiveness, thoughtlessness, lack of self-control, and inexperience. From this discovery will develop an intensification of efforts to inculcate road safety measures in the minds of children.

Japan had 23 fewer banks in 1936 than in 1935.

How Many Pennies Your Child's Life?

Don't Try to "Save" on Home Remedies—Ask Your Doctor

There is one point, on which practically all doctors agree. That is: Don't give your child unknown remedies without asking your doctor first.

All mothers know this. But sometimes the instinct to save a few pennies by buying "something just as good" overcomes caution.

When it comes to the widely used children's remedy—"milk of magnesia"—many doctors for over half a century have said "PHILLIPS." For Phillips' Milk of Magnesia is the standard of the world. Safe for children.

Keep this in mind, and say "PHILLIPS' MILK OF MAGNESIA" when you buy. Comes now, also in tablet form. Get the form you prefer. But see that what you get is labeled "Genuine Phillips' Milk of Magnesia." 25¢ for a big box of the tablets at drug stores.

ALSO IN TABLET FORM:
Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

PHILLIPS' MILK OF MAGNESIA

Coronation Programme A Priceless Aid To Broadcast Listeners

Details Procession Step By Step And Service In Westminster Abbey Word By Word

Recent events in England have necessitated costly changes in the Official Souvenir Programme of the Coronation. Many new plates have had to be made, and portions of the text have had to be re-written and re-set.

Produced in the form of a brochure, the programme will be a masterpiece of the printer's art, in every way befitting the grandeur of the historic occasion it is designed to commemorate. It consists of thirty-two pages of text and illustration, with a cover bearing the Royal Coat-of-Arms, printed in full colours and gold.

According to a bulletin just received by this paper from St. James's Palace, London, the contents will include special photographs of Their Majesties King George VI. and Queen Elizabeth; photographs of Her Majesty Queen Mary, Their Royal Highnesses the Princess Elizabeth, the Princess Margaret, and other members of the royal family; a coronation ode by John Masefield, poet laureate; the King's Majesty, the significance of the coronation to the Empire, by John Drinkwater; description of the coronation procession; a pictorial map of the route of the procession; the coronation service in Westminster Abbey; an explanation of the coronation ceremonial, with illustrations by Sir Gerald Wollaston, Garter principal king of arms; a genealogical table showing the descent of the crown.

With the aid of this programme, those listening to the coronation broadcast from London will be able to follow the historic ceremony word for word, and with complete understanding of what is taking place in the heart-centre of the Empire at each and every moment.

Those wishing to secure a copy are strongly advised to order same through their bookseller or news agent without delay. The price is 50 cents, and delivery may be taken on April 23rd, when the programme goes on sale. Orders so placed now will definitely be filled, but once the presses start no further orders can be accepted beyond the few that can be taken care of out of a very conservative over-run.

Many public and private institutions, societies, clubs and hospitals have already ordered large supplies, and one West African colony will distribute copies in its public schools. Last reports from England are that more than half a million copies have already been sold.

By gracious permission of His Majesty, the programme is being issued by King George's Jubilee Trust. All profits from its sale will be donated to bettering the lot of the under-privileged youth of Great Britain.

"Darling, you were cheated when you bought my engagement ring."

"Oh, no, I wasn't. I know my onions."

"Perhaps, dear, but you don't know your carats."

It is estimated that the average talker speaks about 90 words a minute.

Director Of Broadcasts

Englishwoman First To See Possibilities Of Education By Radio

A member of Sir John Reith's staff of whom little is known outside the B.B.C. headquarters in London is Miss Mary Somerville, O.B.E. She is director of broadcasts. The story behind this amazing service to schools really starts in a remote Scottish hamlet, where a young woman, still an Oxford under-graduate, heard her first broadcast of music, recalls the Glasgow Herald. She was recuperating from an illness, and her great interest was education. Vividly she saw the possibilities, and soon afterwards she found her way to John Reith, then chairman of the old British Broadcasting Company. Mr. Reith (he had not then been knighted) had already determined to explore the possibilities of broadcast education, and he was on the look-out for officials with a zeal for pioneering. He appointed Mary Somerville at once to help in developing the broadcasts to schools. On his advice she went back to Oxford to take a degree, but she travelled up to London once a week to help in the experimental stages of the work at Savoy Hill. It was a tremendous effort to create staff, machine, organization, programs and contacts with schools out of the raw material of men, women and contending ideas.

SELECTED RECIPES

CHERRY ROLL

Temperature: 375 degrees F.
Time: 25 minutes.
1 can cherries; 1 cup boiling water; 1/2 cup sugar; 1/2 teaspoon cinnamon; 2 cups Royal Household flour; 4 1/2 teaspoons baking powder; 1/2 teaspoon salt; 1/4 cup shortening; 1 cup milk; 1 tablespoon butter.
Drain the cherries and to the juice add the boiling water, sugar and cinnamon. Boil gently for five minutes. Sift together the flour, baking powder and salt; cut in the shortening with a dough blender. Make a well in the centre of the mixture, and into this pour the milk. Stir gently and turn the dough on a floured board. Knead for twenty counts; then roll into oblong shape. Sprinkle the dough with the cherries and roll up as a jelly roll. Place in greased casserole and pour the syrup over the roll. Cover and bake in a moderate oven for 15 minutes. Remove lid, spread with the softened butter and bake about 10 minutes until brown.
Recipe by Mildred Mae MacKenzie Copyright.

NORWEGIAN PRUNE PUDDING

1 1/2 cups chopped cooked prunes
1/2 cup "Crown Brand" Corn Syrup
3 tablespoons Benson's Corn Starch
1/2 teaspoon cinnamon
1/4 cup cold prune juice
2 tablespoons lemon juice
Method: Heat the prunes and "Crown Brand" Corn Syrup in top of double boiler. Mix Benson's Corn Starch and cinnamon to a paste with the cold prune juice; stir into the hot prunes. Stir and cook until the mixture thickens; cover and continue cooking for 15 minutes. Remove from heat; add lemon juice. Stir thoroughly. Pour into chilled moistened moulds. Serve with whipped cream.

Taking Rest Cure

Flying Career Too Strenuous For Mrs. Amy Mollison

In a clinic on the mountainside above Geneva, Mrs. Amy Mollison, who is 33, is seeking to win back the health she enjoyed until the strain of her flying career made itself felt. The clinic is close to glorious snowfields where people of every nationality are now sporting themselves. But, although Mrs. Mollison enjoys snow sports, it is likely that some time must elapse before she is able to join in them. When wished a Happy New Year on the telephone, she said: "I am feeling tired. All I want now is to rest, and to get back my strength. My cure will take at least a month," she added. "But then I hope that I shall be quite fit again."

The Right Pronunciation

People In U.S. Flooded Areas Peeved Over Mistakes

We live to learn. A radio announcer, broadcasting from the reinforced revetment wall at Cairo, Illinois, paused in his descriptive story to tell the rest of the world that the people of Cairo were peeved over outside pronunciation of their home town as "Ky-ro." It seems that the local pronunciation is "Kay-ro," and not "Ky-ro," as its namesake in Egypt is pronounced. Another radio announcement gave the local pronunciation of New Madrid, Missouri, as New "Maddrid," with a falling accent on the "rid."

North Carolina used approximately 3,500 bales of cotton in experimental highway construction during the summer of 1936.

A New York advertiser offers to train after-dinner speakers. What they need is not training so much as disciplining.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.
A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

Storing Food In Russia

Soviets Are Preparing For Eventualities In The Event Of War

The renewed war-scare developing from Soviet beliefs that Germany and Japan have signed a military pact directed at the Soviet Union intensified preparedness plans at Moscow.

Russia in general harvested a bumper crop in 1936 and the cream of the harvest is going into reserves, storehouses and underground caverns for possible war use.

The Kremlin's goal is to store provisions and equipment adequate to supply an army of 10,000,000 men in the field for an indefinite period. With its transport system still weak, the Government believes it essential to get these stores into the potential theatres of war in advance.

Although Russian industry constantly increases its output of textiles, the difficulty of buying woollen and even cotton goods in the nation's markets constantly increases. The reason, authoritative quarters hear, is that the bulk of the product is going into the manufacture of millions of uniforms which in turn are being shipped to the Ukraine, White Russia and Far Eastern frontiers.

Shortages of some key foodstuffs likewise are expected to become apparent before next Spring. One of these is butter, which it is known the Soviets now are storing in vast quantities for the Red Army.

Meat is another commodity that is going into cans and warehouses, but no shortage of meat is expected because the forage shortage this year has resulted in an unusually heavy slaughter of livestock, particularly cattle.

Grain, potatoes and staple supplies are also being sent to the war warehouses in large quantities. The Soviets have long been purchasing grain abroad to fill the storage chambers in the Far East, where the goal is to build up supplies that will enable the Far Eastern army of nearly 500,000 men to operate entirely independent of supplies from European Russia.

May Be Made Edible

Australia Starts Research Into Commercial Possibilities Of Seaweed

Frenchmen eat snails and frogs' legs, and Australians have been known to eat disguised shark. Kangaroo tails go into the soup pot and caviare, after all, is only pickled sturgeon's roe. So why should we not eat seaweed?

According to the Australian Prime Minister's Department, hostesses may at some future date serve their guests with seaweed soup, follow it by roast turkey with seaweed vegetables and maintain the diet by adding a dash of seaweed flavor to the jelly dessert.

In Japan soups, jellies, confectionery and vegetables may all have the seaweed flavor, but in Australia this basis of Oriental nutrition is regarded merely as a hazard for bathers.

The possibilities are outlined by the Government in announcing a bequest of 5,000 specimens of Australian marine algae from the estate of the late A. H. S. Lucas, of Sydney. These will be preserved in Canberra for research into the edible and commercial possibilities of seaweed.—Australian Press Bureau.

Lake Mead, created by Boulder dam, has doubled its size in two months and is now 19 miles long.

The male is the weaker sex in spiderland.

DO YOU HAVE "NERVES"?

NO need for girls or women to suffer from periodic pains, headache or sideache. Many find that Dr. Pierce's Favorite Prescription is a very beneficial tonic. This is what Mrs. L. Bowman of 145 Park Row, Woodstock, Ont., said: "I was feeling rundown and out-of-sorts, had frequent headaches, and 'nerves' caused me no end of discomfort. I did not rest well at night. But Dr. Pierce's Favorite Prescription made me feel better in every way. It relieved me of the headaches, improved my appetite and helped to overcome the other symptoms."
Buy of your druggist now! New size, tablets 50 cts. Large size, tabs. or liquid, \$1.35.

Valuable Work Effected By Royal Canadian Air Force In Securing Aerial Photographs

Since 1922 and arrival of the air photograph, 481,000 square miles of Canada have been mapped, mostly in difficult and unsettled regions, Major-General A. G. L. McNaughton, president of the National Research Council, told the Canadian Institute of Surveying.

Speaking at a luncheon in connection with the 30th annual convention, Gen. McNaughton said through utilization of information obtained from air photographs an important new road to a mining area in Manitoba was shortened by 31 miles. The saving, at from \$5,000 to \$7,000 a mile, alone exceeded the total cost of all photographic flying in Canada for a year.

Major-General McNaughton paid tribute to Royal Canadian Air Force flyers who had added considerably to the Dominion's collection of 700,000 air photographs covering nearly as many square miles.

"It was recognized," he said, "from the earliest days of the formation of the department of national defence that the pilots of the air force would need extensive training and practice in air photography, as this is one of their important duties in war, and it was the preoccupation of all concerned to see that this work served also as a useful economic purpose."

"As a result the vast proportion of the photographs, which have been made available for mapping and other uses, have practically cost us nothing, for the flying would have been carried out in any event," he added.

Lieut.-Col. E. L. M. Burns, president of the institute, said adequate mapping throughout the Dominion was essential to successful operation of the trans-Canada airway. He said enormous amounts of money had been wasted through lack of adequate maps in planning main transportation systems.

He advocated extension of topographical surveys to aid in mining development and said the Canadian tourist industry would be greatly developed through proper maps.

A paper dealing with aerial surveys and air transportation was given by F. T. Jenkins of Winnipeg. In discussing commercial aerial surveys, he said this industry would be greatly stimulated if the government would contract for a considerable portion of its surveys.

The National Research Council had constructed two specially designed plotting machines in an effort to improve Canadian methods of making maps from air photographs. R. H. Field, of the council, said in another paper. "Excellent progress" had been made in Canada in this line of work, he said.

Popular Books

List Of Books That Have Been Read By Millions

A list has been prepared of books that in the past 60 years have sold to the extent of a million copies or more. "In His Steps" by Charles M. Sheldon, published in 1899, leads all the rest. It has been bought by 8,000,000 people. Next on the list is "Freckles" by Gene Stratton Porter, with a sale of 2,000,000, followed by "Girl of the Limberlost", 1,600,000 and "Laddie", by the same author, 1,500,000; "The Winning of Barbara Worth", Harold Bell Wright, 1,500,000; "Tom Sawyer", 1,500,000. Others include "Black Beauty", "Ben Hur", "The Outline of History", "Pollyanna", "The Call of the Wild", "Little Shepherd of Kingdom Come", "Treasure Island", "Huckleberry Finn", "David Harum", "The Virginian", and "Five Little Peppers and How They Grew." There are more than 20 of them, of which perhaps three would be rated first class by the normal literary critic.

Modern books to go over the million mark are "Anthony Adverse" and "Gone With the Wind".

Highest Qualification

Twenty-Two Canadian Aviators Receive Transport Pilot's License

Qualification of 22 pilots for their transport pilot's license—highest qualification granted in the Dominion—was announced by G. A. Thompson, general manager of Canadian Airways, Ltd.

Mentioning recent suggestions that Canadian pilots were unprepared for blind flying and use of instruments, Mr. Thompson said Canadian Airways pilots were trained and ready to take over the operation of high speed transport planes if called upon.

Paris, France, did not adopt a standard hour until 1816.

Revolution In Building

Exhibits Indicate Canadians Will Soon Be Using Glass Blocks

Come the architectural revolution in Canada, people who live in glass houses will not have to undress in the dark. Also, they will be able to throw stones just like anyone else.

An impression of architectural trends gleaned from photographic exhibits of outstanding works throughout the Dominion during the last two years indicates glass blocks will be used more and more in Canadian homes and business structures.

The glass blocks admit a lovely light but can't be seen through. They provide an insulation that keeps a home warmer in winter, cooler in summer. They are practically unbreakable.

When the sixth biennial exhibit of architecture and allied arts, sponsored by the Toronto chapter of the Ontario Association of Architects, opened in Toronto recently, Lord Tweedsmuir, Governor-General, delivered the opening address.

Photographs of architectural work in Canada since the last exhibition two years ago presented a panorama of the Dominion's awakening to modern influences, according to John M. Lyle, chairman of the hanging committee.

The revolution has taken seed in Canada, Mr. Lyle said. Younger people particularly are interested in flat roofed homes which allow for sunbathing, complete simplicity of form, elimination of meaningless ornament, use of clearer, brighter colors in decoration of rooms, larger window areas, terraces, air conditioning and indirect lighting.

Also many new fabrics and building materials have been introduced which suggest new designs and forms.

Barley Research

Results Of Investigation Expected To Determine The Better Types

In close co-operation with industry, research on malting barley is being carried on in the Division of Biology and Agriculture of the National Research Laboratories of Canada. The results of the investigation are expected to provide a better basis for the selection of the most desirable types of barley for malting, and as maltsters ordinarily pay a premium ranging at the present time up to 25 cents a bushel for barley of malting quality, the advantages of this research to farmers are obvious.

The average crop of barley in Canada during the last five years has been 73,245,000 bushels, of which from five to seven million bushels were used each year locally for the production of malt. The actual quantity of malt made in Canadian mills in 1935 was 6,411,000 bushels. During the same year the consumption of malt in Canadian breweries amounted to 3,500,000 bushels. Exports of 2,500,000 bushels went chiefly to the United States. In addition, some of the barley exported to the United States is used for malting, and it is estimated that at least from one to two million bushels of Canadian barley are malted each year in the United Kingdom.

Not Yet Achieved

World Has Yet To See Real Christian Country Or City

There is food for thought in the perfectly accurate contention of a writer in the Philadelphia Messenger that the world has yet to see either a Christian country or a Christian city. A Christian city, he says, would be a city without slums, without jails, without poverty, without unemployment, without injustice, without drunkenness, without vice, without jealousy, without hatred, without bitterness. A Christian country, the same writer holds, would be a country without guns, without luxury for the few and hunger for the many, without bribery, without graft, without oppression.—Brockville Recorder and Times.

Dental Bill For Indians

Dental work among British Columbia Indians cost the government \$3,148 in the past three years, according to a return tabled in the House of Commons. Figures prepared by the mines and resources department in answer to a question by H. J. Barber (Cons., Fraser Valley) were: 1934, \$1203; 1935, \$961; and 1936, \$984.

Germany is exporting books at the rate of 93 tons a month.

OXFORD UNIVERSITY CREW GOES OUT FOR SPIN

Led by H. P. B. Massey, son of the Canadian High Commissioner to London, who is the coxswain, the crew of Oxford University carry their boat from the boathouse for a spin on the Isis at Oxford.

May Carry A Moral

Careless Drivers Pay When Self-Appointed Rescuer Is Near

A story in the New York Times seems to carry a moral of some kind for thoughtless drivers.

As the traffic light turned on a busy corner, a frail old woman started to cross the street with a crowd. A big car brusquely nosed its way around the corner. While others scattered out of the way, the old woman stood still, seemingly incapable of movement.

Just as the car seemed about to hit her, a silk-hatted man, with a cane, limped quickly to her side and swung her out of harm's way. At the same moment there was a sharp report, and the tire of the car went flat.

Talking to a nearby policeman, a few minutes later, a reporter learned that a similar incident had been happening nearly every morning, and that the silk-hatted man figured in each of them.

Following up the story, the reporter learned that the man was a former diplomat, whose foot had been crushed by an automobile; and that it was not a cane he carried, but a sword stick.

The forgotten pedestrian, who has to keep out of the way of imperious drivers, should be glad to know he has an avenger.—Guelph Mercury.

Not Much To Ask

An Ohio state university professor at Trenton, N.J., said that chickens need meals in bed, and air conditioning and diffused lighting in their houses. Such treatment, according to the St. Thomas Times-Journal, should result in eggs being laid, fried, boiled, scrambled or poached, as desired.

France is the principal world source of bauxite, from which aluminum is derived.

A cat's whiskers, normally, are just the width of its body.

Match Industry In Japan

Started In Small Way From Technique Learned In France

The Japanese match industry was started in a small way many years ago; the technique of the industry was learned in France. After a few years Japan was practically self-sufficient and had begun exporting in a small way. No conspicuous success was achieved, however, until the World War. The year 1919 witnessed the peak development with an output totalling some 518,738,000 dozen matches valued at 39,652,000 yen. Competition from the European producers of matches, principally Sweden, in the following year, combined with the establishment of higher duties in some export markets, mainly India, resulted in output falling to 20,711,000 dozen safety matches valued at 8,063,000 yen in 1933. The industry is based to a great extent on highly efficient handicraft with wages paid largely on a piece-work basis and with a ratio of one male to three female operatives.

Horses Of All Ages

Saskatchewan Has More Than Ontario And Quebec Combined

Reports that the horse is "coming back" are confirmed by the current bulletin of agricultural statistics from Ottawa. While the estimated total on farms of Canada in 1936, namely 2,918,540, shows a decrease of 12,797 from that of 1935, the number of colts and fillies is up 35,190 from that of the previous year. More young horses are being raised in every province of the Dominion except New Brunswick, Alberta and Saskatchewan.

The last-named province, by the way, has more horses of all ages than Ontario and Quebec combined. But its 1936 total, at 905,600, is down 28,200, which is more than twice the total decrease for the whole country. Alberta, though its total also showed a slight decrease, had 18,600 more colts than in 1935.

A Beginner Could Crochet These

Household Arts by Alice Brooks

Crocheted Lengthwise They Go Fast

You'll want them for immediate wear—these smart gauntlets—and you can make them of string or yarn. They'll make your hands look their prettiest! A beginner can crochet them—they're that easy! They're done in lengthwise strips, using a simple stitch that's ever so effectively set off by a trim of popcorn stitch. These follow the new line of smart gloves to-day. In pattern 5792 you will find detailed instructions for making the gloves shown in a small, medium and large size (all in one pattern); material requirements, illustrations of the gloves and of all stitches used.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Rust Resistant Wheat To Be Seeded This Year Will Be Distributed In West

Seeds Gave Him Idea

Inventor Of Autogyro Told How Plan Originated

It is grim irony that Juan de la Cierva, who spent his life in seeking to make flying safe should lose it in one of the worst air disasters England has known, comments the Daily Sketch. Although Cierva was only 41, he had more than a quarter of a century's experience of aviation, for he began experimenting at the age of 15. He built the first aeroplane ever made in Spain. He told once how he conceived the idea of the "windmill" plane or autogyro. "I noticed the seeds falling from a sycamore tree," he said, "and it occurred to me to wonder why they fluttered down instead of falling plop. Then I noticed that each seed had two wings that spin round and buoyed it up. 'So I thought I'd see if spinning wings would keep a plane in the air.' Cierva had persistence as well as imagination or he would never have succeeded. He made 32 different autogyros before he even began to be satisfied. At first his father, a famous politician and formerly Spanish minister of war, helped him with funds. But the two men whose faith and backing finally established the autogyro as a commercial possibility were British—Lord Weir, the engineering magnate, and H. K. M. Kindersley, the banker.

Camouflage Just A Trick

Does Not Always Work Perfectly Even With People

Camouflage is the trick of making a thing look like something else. A battleship is painted to look like the waves. A building is covered with branches to make it look like a clump of trees. Other instances will occur to you.

But camouflage doesn't always work. The battleship can easily be located by a tiny machine that picks up its vibrations, and tells exactly where it is and how fast it is going; or an aeroplane can see both ship and the shadow cast by it.

There are many people who camouflage their words and actions and motives. If they fool anybody it is not for long. There is always something that betrays them for what they really are. The honest person never tries to camouflage. He does not pretend to be something that he is not.

Don't camouflage. The trick is easily spotted, and it is always a sign that there is something wrong somewhere. Be yourself. Be the best yourself that you possibly can, and you'll never need camouflage.

Should Know Their Business

Farmers Advised To Take Inventory And Keep Books

With the beginning of a new year farmers are being urged by university extension departments to know their business better by taking inventory and keeping simple sets of books.

The University of Tennessee Extension Farm Management Department sets forth that an inventory has five good uses:

It shows net worth above all debts. It shows the financial progress made in the year.

It forms an excellent basis for preparing a credit statement to be used in getting bank credit.

It is a valuable list of property for use in settling an estate or establishing insurance claims in case of fire or other destruction.

It brings to light needed repairs and replacements, shortages or surpluses of feed, seed and other supplies that should be bought or sold.

In many states university extension departments furnish forms for the inventory and bookkeeping and at the end of the year make an audit of the account.

Have Become A Luxury

Imports have been so severely restricted by Germany's four-year plan that beauty parlors in Berlin have been unable to get eggs for the favorite shampoo. As a result, women arrive to keep appointments with the hairdresser clutching paper bags containing fresh eggs.

Although nearly 20,000,000 of them enter the earth's atmosphere every 24 hours there is no authenticated record of any person having been killed by a meteorite anywhere.

At one time, Kansas had a prairie dog town five miles wide and 100 miles long.

Federal government efforts to halt the rust scourge in western wheat fields by large-scale distribution of a rust-resistant wheat variety was announced by Hon. J. G. Gardiner, minister of agriculture.

More than 6,000 bushels of the new variety, named Renown, will be distributed at \$2 a bushel to farmers in rust-affected areas in the prairie provinces. Although each applicant is limited to two bushels of this test wheat, enough applications have been received already to exhaust the supply when distribution is made.

The new wheat will be distributed from the following points: Indian Head, Sask.; and Brandon, Portage la Prairie, Arborg, Dugald, Gilbert Plains, Gunton, Katime, Petersburg, Plumas, Roblin, Silverton, Swan River and Pipestone in Manitoba.

"It should be understood the seed under consideration does not possess any special standing other than that of belonging to a new variety capable of resisting rust," said Dr. L. H. Newman, Dominion cerealist.

"We want the farmers to give it a fair trial and report next autumn giving their observations as to how it compares with other varieties grown near by."

Dr. Needham said the Renown variety was produced by Dr. C. H. Goulden at the Dominion rust resistant laboratory, Winnipeg.

He said three varieties of rust resistant wheat are now produced, Renown, Apex and Thatcher. The Dominion department of agriculture is concerned officially only with the distribution of Renown.

Apex is a variety developed at the University of Saskatchewan, Saskatoon, from a composite crossing program involving the varieties, Marquis, Kanred and Iumillo. Thatcher variety was produced from a cross made at the Minnesota agricultural experimental station, St. Paul, Minn. It was grown on many farms throughout Manitoba and Saskatchewan in 1936. Apex is being distributed by the University of Saskatchewan.

Too Young For Promotion

Two-Year-Old Boy Finishes First Grade With Honors

A little discouraged because he was not promoted to second grade this year, three-year-old Joey Ford brushed up his scholastics and prepared to confound Columbia University's learned doctors.

Joey, who at the age of two showed a great capacity for learning and carrots, sailed through first grade in Los Angeles professional school with ease and charged back this year to tackle addition, subtraction and the multiple difficulties of the second grade.

But there he ran into grief. Because of his extreme youth, teachers thought it best not to promote him despite his first grade honors.

That's why Joey was in New York—to get a special intelligence test at Columbia. Doctors think he's about four years ahead of himself. When reporters visited him, Joey read a hilarious tale of a rabbit, detailing the difficulties of a bunny who was caught stealing jam.

"You see," he told them, "the naughty bunny was in a jam!"

Riddles Of Long Ago

Trace Back Brain Twisters To 400 B.C.

One riddle a champion riddle-collector couldn't unravel recently was: How old is the oldest riddle? This poser, admitted Dr. Archer Taylor, had him stumped. Dr. Taylor, chairman of the department of Germanic languages and literature at the University of Chicago, said he found evidence of "the Sphinx" riddle as far back as 400 B.C., in writings of Euripides. But even more ancient the professor felt, was a riddle based on numbers, and which had been traced back definitely 1,500 years.

Out Of Sight

Mike was smiling all over his face. "I've a dandy job now, Pat," he told his friend.

"Who is it ye work for?" asked Pat.

"Casey's, the contractors," was the reply.

"Phwat is it ye're doin'?" inquired his friend.

"Diggin' a well," replied Mike, with an artful wink. "I've dug down so far now that th' boss can't see if I am workin' or not."

A test of genuine mahogany is to look for the pores, like pinholes, in the end grain of the wood.

Local L.T.B. Members Elected To Provincial Grand Lodge

The 27th annual session of the Provincial Grand Lodge of the Loyal True Blue Association was held in New Westminster last Friday and Saturday, with the largest delegation in years attending. Several members from this district were present.

Election of Officers took place, and resulted in J. J. McLean of Huntingdon being elected Provincial Grand Director of Ceremonies; W. R. Waterston Jr. was elected Provincial Grand Outside Tyler. Members of the Protestant Home Board elected from delegates from the local lodge were J. J. McLean, Mrs. M. Anderson and Mrs. W. T. Waterston.

Reports from the primary lodges and the grand lodge showed that the association enjoyed a very creditable year.

Those attending from Abbotsford were J. J. McLean, W. R. Waterston Jr., Mrs. M. Anderson, Mrs. E. J. Waterston, Mrs. M. Armstrong, Mrs. W. Roberts, Mrs. N. Combs, Mrs. W. Mouldiey.

OBSERVE EDUCATION WEEK WITH INTERESTING PROGRAM

A large crowd of parents and friends attended a programme and display of class-room work in the Huntingdon School on Friday Feb. 26th. Commencing at 1.30 p.m. the programme consisted of speakers, a debate between Grades Seven and Eight and education films for the young and old.

Mrs. Fraser York, old time resident and former teacher from Sumas, gave a most interesting paper on "School in Pioneer Days." Mr. M. Greyell, Principal of the school, contracted the older type of school work with the modern trends in education.

Mr. P. H. Dawson spoke on the development of Transportation, and Rev. Robt. Moses gave a delightful talk on "Canadian Ideals".

The P. T. A. under the convenership of Mrs. H. E. Beeststone served tea afterwards.

A more active interest has been shown in the Huntingdon P.-T.-A. by the parents recently, and at the last meeting, held March 3, there was a marked increase in attendance. An amusing contest was held at the conclusion of the business meeting. The highest scores being made by Mrs. J. Brown and Mrs. Lillow. The next meeting of the P.-T.-A. will be held on April 7.

Sermonette

Asking God on our knees to bless everybody isn't half as manly as standing on our feet, reaching down and helping somebody.—The Moncton Transcript.

Governments Should Consult Municipalities On Land Scheme

Meeting of the Fraser Valley Reeves' Association was held in New Westminster last week. A committee composed of Reeve Cruickshanks of Matsqui, Reeve Hogen of Sumas, Reeve Hope and Reeve Mussallem and Councillor J. W. Ardiel was appointed to interview the B.C. Electric Company in connection with powerline extensions.

Reeve Cruickshanks addressed the meeting in objection to the reported proposal of the Provincial Government in conjunction with the federal authorities to establishment of land settlement schemes. Municipalities affected by the proposal should be consulted, declared the Matsqui reeve.

AGASSIZ-ROSEDALE FERRY RESUMES NORMAL SCHEDULE

Ice on the Fraser River which has held up ferry service between Rosedale and Agassiz for some weeks began to move down the river Sunday and Monday, and across river transportation was re-established between the north and south banks Tuesday. Resumption of service will establish a normal flow of traffic between Chilliwack and points south with Agassiz and Harrison Hot Springs.

JUNIOR BADMINTON TOURNEY PROMISES TO BE BIG SUCCESS

All plans for the Central Fraser Valley junior badminton championship tournament are nearly complete and there is every indication that the event, which will be held in the auditorium, will be a great success.

A complete list of challenge trophies will be competed for, and these will be on display in the near future. Entries to date indicate that there will be over a hundred and twenty five young shuttlers from all parts of the valley competing.

The challenge cups to be competed for, and their donors, are as follows:

Boys' Singles, under 18 (Anonymous, Vancouver).

Boys' Doubles, under 18. (Abbotsford Badminton Club; H. F. Quinn, Abbotsford.)

Girls' Singles, under 18. (David Spencer, Vancouver.)

Girls' Doubles, under 18. (Lisle Fraser, Vancouver; Dr. Barber, Chilliwack.)

Boys' Singles, under 15. (B. C. Electric.)

Boys' Doubles, under 15. (Abbotsford Corporation; Anonymous, Abbotsford.)

Girls' Singles, under 15. (Abbotsford Lumber Co.)

Girls' Doubles, under 15. (Anonymous; Mrs. Hulton-Harrop.)

Beginners' Classes, under 15. (Abbotsford Junior Badminton Club.)

The second prizes in all events are very attractive also.

Mrs. Margaret Trethewey, who is organizing the event hopes that all junior players in the district will enter, even if they feel certain that they cannot beat certain players, as it is quite possible they may never meet them, the names being drawn for.

The district trophy is one that the winners may well be proud of, and local players should make a determined effort to keep it in this locality.

The tournament will be held on March 20 and 21, and entries will be accepted up till March 23rd.

Abbotsford junior badminton teams defeated a squad from Mission last Saturday, by a score of 9-8. The contests were fast and well played.

Next Saturday and the following Saturday it is planned to play off the local junior badminton club singles tournament. Two small cups are at

B.C. ELECTRIC-MOFFAT FREE COOKING CLASS

ABBOTSFORD THEATRE ABBOTSFORD March 15th, at 2 p.m.

Monday, March 15, at 2 p.m. in the Abbotsford Theatre, Miss Dorothy H. Baxter, Home Service Director of the Moffat Company, will conduct a free cooking school under the sponsorship of our Abbotsford store.

You and your friends are cordially invited to attend this session which will be packed with interesting lectures, open discussions, cooking demonstrations and attendance prize awards.

Programme

Oven dinners, the preparing, cooking and serving of meats and vegetables and novel, economical ideas for desserts will be features of the culinary side of the program. All the recipes used in the class will be supplied in a standard form for filing and ready reference. Demonstrations will be made on the very newest model automatic Moffat electric ranges.

Free Attendance Prizes

The session will feature the awarding of several fine prizes including a new type Moffat kettle for use on modern automatic ranges, two aluminum cookie sheets and three cake coolers. In addition, several of the cakes and outstanding dishes baked during the school will be given away.

Free Installation of Ranges

Good news for all is the B.C. Electric's announcement of FREE INSTALLATION on electric ranges. The many new Moffat styles on display will be completely installed in your home FREE, and, easy terms of only \$5 down may be arranged. In addition there is a generous allowance for your old stove.

LAKE HATCHERY DISTRIBUTES 1,000,000 FISH EGGS AND FRY

Nearly one million trout eggs and fry were distributed by the Cultus Lake hatchery during 1936. Eggs fry and fingerlings were sent to and planted in Stanley Park hatchery, Sweltzer Creek, Echo Lake, Elbow Lake, McConnell Creek, Wolf Lake, Marshall Creek, Vedder river and Upper Sumas river.

Of these 418,781 were steelhead, 69,461 Kamloops, 393,556 Cohoe, and 82,724 cutthroats. Of that amount 355,010 were liberated from the feeding ponds at Smith Falls hatchery. All planting was made in tributaries to the waters mentioned and above the coarse fish line.

This information was supplied to fisheries guardian W. J. Barker. No trout eggs or fry were distributed in Cultus Lake which lake the association is endeavoring to have stock

Save Up to 40 Per Cent on Your Spring Orchard Sprays

You can make a saving of 30% to 40% on your cost of spraying your fruit trees this spring if you use Watkins Stock Dip (Insecticide, Dip and Disinfectant). Costs far less than nicotine, but does the job of controlling insect pests such as aphids, pear psylla, and oystershell scale. Leading growers recommend its use right through the season as a spreader and sticker with limesulfur and arsenate of lead.

Compare the Cost
 and I'll prove I can save you money. I can do it on other products that you need such as Fly Spray, Stock and Poultry Preparations and household products. I have some real bargains now on genuine high quality Watkins Products so it will pay you to wait for my call.

WORLD HAPPENINGS BRIEFLY TOLD

A group of Belgian industrialists plan to visit Canada in May in an effort to increase trade between the two countries.

A King George V. gold crown piece, one of only 25 issued in connection with the silver jubilee of that monarch, has been sold for £200 (\$1,000).

The University of Saskatchewan is sold out of Apex, the new rust-resistant wheat, Prof. Manley Champlin reports. Since Jan. 18, when the wheat first was offered to farmers, 70,000 pounds have been sold.

"Japan's Feet of Clay," a book in which Miss Freda Utey, correspondent of the Manchester Guardian discusses Japanese industries and general economics, has been banned from Japan.

A \$6,000,000 relief works program for Winnipeg had the approval of the city council upon the recommendation of the civic relief works committee. It includes erection of a new \$1,500,000 city hall.

Finding that delinquent or underprivileged children from four to 16 years old react favorably to musical instruction, one New York borough is giving music lessons to such children.

Mrs. Jessie McBeth Goodfellow, 70, first white child born in Prince Albert, died recently. She was a daughter of Rev. and Mrs. John McKay, who helped establish the city in 1866.

The personal columns of The London Times carried the following notice: Wanted—Dangerous (legitimate) job for cultured sportsman, 33 years old; five languages; six years interior Africa, caravan expert."

Time Fully Occupied

Chairman Of B.B.C. Advisory Council Is Busy Man

Lord Macmillan, who succeeds the Archbishop of York as chairman of the B.B.C. Advisory Council, is one of the busiest of men. The number and variety of the commissions and inquiries over which he has presided in the past 12 years, in addition to his legal work, is astonishing. These are the subjects with which they dealt: Lunacy, miners' wages, the British Pharmacopoeia, street offences, finance and industry, income tax, the wool industry, shipbuilding, Canadian banking, and disputes between Holland and Norway. Somehow, he finds time, too, to work for the Pilgrim Trust, the Carnegie Trust, a hospital, the National Library of Scotland, a Scottish legal society, and King George's Jubilee Trust, recounts the News of the World. Such a list makes it easier to believe a story told of his days as a judge. To a long-winded counsel he is said to have sent this note: "Patience Stakes: 1, Macmillan; Also ran, Job." Counsel took the hint.

Russia's Wheat Problem

To Plant 235,000,000 Acres Of Soviet Farm Land

Schedules for planting 235,000,000 acres of Soviet farm land this spring were published recently in Moscow.

About 88 per cent. of this area will be planted by the kolkhozes (collective farms); 11 per cent. by the sovkhozes (state farms); and less than one per cent. by individual peasants.

The schedule provides measures to guarantee the high quality of farm products. Semi-official sources declared the coming year should see unprecedented development of the speed-up movement and an increase in all harvests, especially grain.

Proof Enough

Private Parker was applying for a new pair of boots.

"The boots you have are not worn out yet," growled the quartermaster. "Not worn out?" cried Parker in amazement. "Why, the soles are so thin that if I tread on a dime I can tell whether it's head or tail."

Prehistoric Animal

Mammoth Bones Found By Workers Near Lebrét, Saskatchewan

The sketches which accompany this article show bones of a mammoth which were found near Lebrét, Saskatchewan, by half-breed road workers.

They were in the possession of Dr. V. Rondeau, dentist of Rouleau, Sask., and are supposed to be about 10,000 years old.

The mammoth, progenitor of the modern elephant, inhabited the temperate parts of the northern world during the glacial period, and survived until the Neolithic period of human history, a comparatively recent time.

The animal was about the same size as the modern Asiatic elephant.

was covered with a thick skin clothed with long dark hair and woolly fur, and had two large tusks.

No. 1 shows the masticating surface of a molar. This tooth measures three inches and a half in its longest diameter.

No. 2 shows a vertebra. It measures 12 inches from tip to tip.

No. 3 is an ordinary hammer and was sketched to show the comparative size of the bones.

No. 4 shows the shoulder or hip blade. It is two feet long and weighs 14½ pounds.

No. 5 shows another bone of the same animal.

SLENDERIZING WORK-A-DAY FROCK A CHEERY SIGHT IN COTTON

By Anne Adams

4319

Three Adams

Making your own frocks is a happy experience when you've as smart and simple a pattern as 4319! Looking forward to a busy season of home-making activities? Then make sure you've at least one version of this flattering and comfortable style in your wardrobe to keep you looking young and slim all day long! Trim panels accomplish fashion-miracles in making you appear inches taller, and cut in one with the brief capelets, they contribute to your frock's easy making. Low V-necks are always becoming and this version boasts the added attraction of saucy pointed revers. A narrow, adjustable tie-belt completes your fashion success. A cheery sight, this frock, in brightly printed percale, sturdy gingham, or plain broadcloth!

Pattern 4319 is available in sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 3½ yards 36 inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

BIRD SANCTUARIES

Jack Miner and his two sons, Manly (left), Jasper (centre), about to liberate a pair of Canada Geese to study their route of migration for scientific purposes.

Most people look upon Jack Miner's tagging system of ducks and geese as a hobby, when the fact of matter is it can't be estimated the value in dollars and cents by the various provinces of Canada and American States, because it gives the authorities knowledge of where the birds are each season of the year, and which state and province kills the most and where they are killed in any huge number.

For illustration, North Carolina at one time was killing more than any ten states. Jack Miner gives this information to the proper authorities with the result that several sanctuaries were established in that locality which gives the birds a place to breathe between shots. Had it not been for Jack Miner's tagging system the authorities would not have realized what a great percentage was being killed in such localities.

The sanctuary has proven that birds will come back to the same place for food and protection. While making a catch a goose was caught wearing two tags—one on each leg. One had been put on in the fall of 1924, while the tag on the other was placed on in fall of 1928. Several are often re-caught which have been tagged back as far as the fall of 1928, but seldom is one caught that has been tagged back as far as 1924, chiefly because Jack Miner wasn't tagging many back that far. Last winter one was killed in North Carolina that had been tagged in 1918, making 14 years it had worn the tag; or in other words 28 trips across the continent. Jack Miner asks how many trips would it have made back and forth across the continent had it not had a sanctuary to give it safety from the hunters' shot and shell.

Furthermore, the tagging system proves that they go from one place of safety to another. Jack Miner has received several photos from owners

Jack Miner with a pair of Canada honkers which he has caught and tagged and is about to liberate them to see where they are killed, who kills them and to gain other scientific knowledge of their habits and migration routes.

Outsiders Get Posts

United States Scientists Hold Jobs In British Universities

Throughout the Empire there was a growing tendency for the best posts in science and engineering to go to citizens of the United States declared Frank Parkinson, guest of honor at a function given by the chancellor and senate of Leeds University. Mr. Parkinson, who is head of a well-known Leeds firm, recently gave \$1,000,000 to the university.

In trying to find out why this state of affairs existed, Mr. Parkinson said he had had the opportunity of meeting some of these people. He found they had qualifications which rendered them suitable for the posts. The posts were entirely free from any pressure, and, in fact, other things being equal, the British subject would have been preferred.

He wondered whether there was anything in the science training of the universities of the United States which qualified their students better for the posts. He was perfectly satisfied the material available in Britain was better than that in the United States, and he could only think there was something in the training they received that produced these results.

Mr. Parkinson expressed the belief that the provincial universities of Great Britain were the best institutions for improved science training. He thought this for two main reasons. A sterling quality of character existed in the provinces to a greater degree probably than in some other parts of the country. Furthermore, he believed that the older universities were not quite so well qualified to meet the situation for one main reason that they drew their students from a different strata of society.

Coal has been discovered under a street in Glasgow, Scotland.

San Salvador complains of being overstocked with German goods.

Canadian Dramatists

Receive Praise From Adjudicator For Dominion Drama Festival

Praise for the interest of Canadians in the drama and for the virility of Canadian plays was voiced by George De Warfaz, London, England, regional adjudicator for the Dominion drama festival.

"I have never seen a people anywhere with a keener interest in drama," he said. Three plays written by Canadians had already won places for the festival final. They were characterized by freshness and spontaneity. He was particularly happy, he stated, because they were thoroughly Canadian in conception and not imitations of foreign products.

The regional adjudicator began his duties at Saint John, N.B., January 25, and completed his work in the eastern part of the country in Montreal. Competitions were also held in Ontario cities. Mr. De Warfaz will travel west, completing his adjudication in Vancouver, March 27.

Michael St. Denis will be the final adjudicator when the Dominion festival is staged in Ottawa the week of April 26. Mr. St. Denis is a brilliant representative of the modern French theatre, who is now director of the London Studio Theatre (Le Theatre Ecole).

It is told of a sage that one day, after the fashion of his school, he was questioned, "Master, what is the test of good manners?"

"It is being able to put up pleasantly with bad ones," was the quick reply.

An inch of rainfall provides 100 tons of water to an acre. Twelve inches of snowfall equal one inch of rain.

More than 1,600 languages are spoken in North, South, and Central America.

T.B. Killing Off Eskimos

The Adoption Of White Man's Clothing Said To Be Largely Responsible

Tuberculosis is killing off Eskimos and Indians in Alaska 10 times as fast as it kills whites in the United States. And why?

"They have taken to silk stockings, calico dresses and white man's clothes instead of warm fur," says Senator Thomas (D., Okla.), chairman of the United States Indian affairs committee.

"They lack the white's immunity to white man's diseases, and are woefully poor and oftentimes ignorant," observed Dr. James G. Townsend, director of the health division of the office of Indian affairs, one-time resident of Alaska.

"Miners' flapjacks and sowbelly instead of native fish and seal blubber," was the comment of an Alaska bureau official who declined to let his name be used.

The death rate, described by these three men as appalling, was disclosed in a study by Dr. F. S. Fellows, past assistant surgeon-general of the United States public health service and director of the Alaska medical service. Dr. Fellows reported the death rate among Alaskan Eskimos and Indians as 655 per 100,000. It was about 57 per 100,000 in the United States.

Other officials expressed belief the senator had referred to silk stockings and calico dresses simply to epitomize the devastating effect upon the native races of the invasion of the white man with his diseases.

Thomas said the Eskimo and Indian women in particular had taken to American style dress in large numbers regardless of low average temperatures in Alaska, and as a result had lowered their resistance to tuberculosis—by far the most deadly disease among them.

French Air Force

Has Been Increased 37 Per Cent. Since Last June

The French air force has been increased 37 per cent. to approximately 4,000 machines since last June 1, the air minister, Pierre Cot, told the chamber of deputies. He implied France's air force was strong enough to meet any air threat by Germany, picturing it second only to Soviet Russia's.

His address followed upon a declaration by Communist Deputy Gitton that Germany's "motorized army of 1,100,000 men" could be hurled at the French frontier over new super-highways at the rate of 70,000 troops an hour.

An hour formerly was one-twelfth of the time between sunset and sunrise and one-twelfth of the time between sunrise and sunset; hence, it was of different lengths in different seasons.

The Dominican frog skips the tap-pole stage entirely. It develops inside a crystal-like egg and emerges as a full-fledged frog.

Britain is building houses at the rate of one a minute.

Czechoslovakia is importing less crude oil and more gasoline.

Conducts Orchestra In Palestine

Toscanini's Organization Composed Of Jewish Refugees From Germany

Arturo Toscanini, who will be long remembered by New York audiences for his musical genius and by all for his courageous anti-Fascist stand, has found a new field for usefulness in Palestine, where he has been conducting an orchestra composed of Jewish refugees from Germany, a musical organization which he has hailed as one of the world's finest. Palestine showed its appreciation recently by presenting Signor Toscanini with an orange grove which is expected to bear fruit next year and which bears his name. Toscanini, in giving thanks, announced that his refugee orchestra might go to Paris next summer to demonstrate its distinctiveness to the world.

Dolls For Princess

Two Miniature Dolls Received By Princess Elizabeth

Princess Elizabeth is not usually permitted to accept presents from strangers. But an exception was recently allowed for Eileen Martin and her young sister, Betty, of Weymouth, who sent the princess two miniature dolls.

The girls have received a letter from the queen telling of her majesty's decision.

The dolls are so small they were sent in a matchbox. Eileen explained she had seen pictures of the princess's dolls and they were all large so she tried to complete the household with smaller ones. They were hand-made.

Savings banks of Australia have deposits of \$1,110,000,000.

Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh...delicious! Para-Sani keeps them from staling. Get Para-Sani in the handy, sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Pull" Packs in sheet form.

SORE THROAT RELIEF

Famous 1-2-3 Method

At the first sign of sore throat due to a cold, dissolve three "Aspirin" tablets in 1 1/2 glass of water. Gargle with this twice. It will act almost instantly to relieve the rawness and soreness of your throat. At the same time, take two "Aspirin" tablets with a full glass of water. This acts to combat fever, cold aches and pains and the cold itself. Repeat the treatment in 2 hours if necessary. This modern way to treat a cold is approved by thousands of doctors.

"Aspirin" tablets are made in Canada by the Bayer Company, Limited, of Windsor, Ontario.

Thou Shalt Not Love

— A NOVEL BY —
GEORGIA GRAIG

CHAPTER XVI—Continued

He broke off abruptly. They had both become conscious of Michael's eyes following them. Michael's eyes held a gleam of jealousy as he viewed this intimate little scene between his wife and the man who once had been reported to be her lover.

They were back in the privacy of their own apartment, however, before Michael said a word. Then he burst out:

"I'm sorry we had to run into Marlowe tonight, Starr. I intended for you never to see him again."

Starr's face was strained. She had known subconsciously that it would be like this. All through their honeymoon in the country they had not mentioned Lance's name at all, as though by common consent. Michael had asked her nothing about the man. But she could not forget—Once, in that despairing mood, she had tacitly admitted to Michael that she had taken Lance Marlowe as her lover. That she had said it when she did for Michael's sake meant nothing now. If only she had not!

And now, because of Lance, after their long days of peace, they were in the midst of conflict again, tortured with memories which refused to be lived down.

It all was so plain to Starr. . . . Gossip linking her name with Lance's; her own voice crying out to Michael on that crazy night, telling him that she had been Lance's mistress, trying to make him hate her.

It was more than Starr could bear. She turned to her husband swiftly, pleadingly. Her voice raged.

"Michael, I've wanted to explain to you so many times, only somehow I couldn't. There has never been anything between Lance and me—never! I lied to you. All of that awful time I was living a lie! Michael, you do believe me, don't you? You must believe me!"

Michael, looking down on her said: "Of course I do," pressing her small, cold hands very tightly in his big

YOUR BODY'S BIGGEST ORGAN

It has so many functions that if unhealthy in action, multitude of ills result.

Yes! It's your liver that affects your digestion, blood, skin, muscles, reproductive glands—Including intestines and certain glands—Including may suffer headaches, nausea, indigestion, constipation, backaches, yellow skin and other ills. So keep your liver active. Use Fruit-a-tives, the famous remedy that contains extracts of fruits and herbs—that works with nature to stimulate the liver, the proper flow of bile. Fruit-a-tives cause the intestinal tract, tend to purify the blood of poisons and acids. Their tonic effects help bring new life and energy. Start Fruit-a-tives today. And be sure to get genuine "Fruit-a-tives"—don't accept substitutes.

ones. "You're my wife, and I love you."

But there was a strange edge to his voice which chilled her, in spite of his words.

CHAPTER XVII

Busy days again. Except for that slight undercurrent of an imperfect understanding which Starr felt as if she were a diving rod for Michael's moods, happy days. So much to be done. And, as always at such times, little chance to think.

Michael threw himself into business with a will, making up for lost time. He left it to Starr to hunt out their new home. She had about come to the determination that they should not live in an apartment house at all, but should take one of those attractive houses out in Forest Hills. So much more like a home, with an upstairs and down, your own lawn, and a lovely wistaria vine that would be a purple cloud in the summer time.

Michael made a little objection. It was so far away from business, he said. But with a wifely concern for his health, Starr insisted that the drive into town each morning would be just the thing he needed. Perhaps he would not get any fresh air otherwise.

So it went, with most of their discussions at breakfast, at the luncheons downtown which Starr sometimes took with her husband, and during the placid evenings they spent together in the Egyptian living room with the Del-el-Bahari fresco. Life was perfect again—almost.

Then cataclysm. It was on a December morning not far from Christmas time when Starr received the first of the threatening letters.

She was seated across the breakfast table from Michael in the little alcove overlooking the shining East River when Sapphira came in with the morning mail. She handed it all to Michael, who ran his eye through the letters and handed over an envelope addressed to Starr. It was addressed in a rough, unformed hand. Not to Mrs. Michael Fairbourne, but simply to Starr Ellison.

Michael laughed queerly as he glanced up at her, handing her the letter.

"I thought everybody knew that we were married. Better advise your friends, Starr."

That was ridiculous. Actually she had not a friend in the world, now that she had cut herself loose from those who had known her in the New England town, who probably had not the faintest idea she was still in the land of the living. No friends—only acquaintances. Like Lance, and Stephanie, Tod Ranger, and perhaps Marjorie Browning, and the rest of that fast-stepping crowd. Certainly they could not be called friends.

With a curious pang of fear that caught her breath in her throat, she slit the envelope. A half strangled cry was forced back from her lips as the words stared at her. Then nameless dread plunged through her like a cold dagger.

On a single sheet of paper was written in that same unformed hand: "You cannot escape your fate. You and the man you love."

There was no signature, only a queer scrawl near the bottom of the page that may or may not have been hebraic writing. Starr did not know.

She was in a daze. Then she became aware that Michael was saying sharply:

"What is it? What's the matter, Starr? Don't look like that!"

Somehow she pulled herself together, tried to smile with unconcern.

"It's nothing," she said, with too elaborate carelessness. "Nothing at all." But her lips shook, and her face was as white as the paper she held in her hand.

Michael's eyes seemed to be peering down into her very soul. He said sternly:

"Nonsense! There is something the matter. You look positively sick, Starr."

The note was crumpled in her nervous fingers. She stared at him in a stricken silence. Michael held out his hand. Masterful again.

"Star, let me see that letter." Her numbed lips moved, and in her dark eyes was tragedy. She shook her head.

"I can't, Michael. It isn't anything. I told you so."

The familiar line on Michael's jaw stood out. He spoke steadily.

"There should be no secrets between husband and wife. Let me see that letter!"

It had become a matter of vital importance now. Michael was demanding a husband's rights, and Starr knew she must refuse him. She would refuse him, no matter what happened. And he was probably thinking . . .

Suspicion clouded Michael's face. Suspicion edged his voice.

Starr did not dare imagine what he was thinking. But she was think-

ing—remembering. . . . That whispered conversation with Lance, and now came a mysterious letter which she would not explain. Did he think that she and Lance was communicating clandestinely, and only the chance of this letter having arrived at an inopportune time had betrayed the secret?

Dully Starr repeated, as she shook her head: "I can't!"

Michael did not ask her again. He simply got up from the table, leaving his breakfast half finished. He stalked out into the entry way and yanked his hat and coat from the hook. Starr heard the outer door bang behind him. It was the first time since their marriage that he had gone out of the apartment without kissing her goodbye.

The distraught bride paced her long living room in a mental torment. She paid no attention to Sapphira's perplexed comments, as if she had not heard her.

What was the meaning of this ominous note? Where had it come from? Who knew? It was like a direct answer to the fear which had been growing upon her slowly since the day her honeymoon ended.

In spite of her busy days, she had had long hours in which to brood, hours when she was alone. Michael, fired with the enthusiasm of providing for their future, had been working under double pressure. She had been thinking about the future, too, defying her inexorable fate, planning, working for a home in which she and Michael should spend long years together. She might have known the futility of that!

Weeks had sped by rapidly. With a dazed feeling Starr now suddenly realized that it was many weeks—weeks that had flown into months—since the doctor had told her: "You won't live another six months."

Suppose his prophecy came true? Suppose the curse did fall upon her, as all along she had felt in the depths of her soul that it would? She had defied her destiny. Love—married. Was it to end now—her forbidden happiness?

(To Be Continued)

Royal Robes

Royal School Of Needlework Engaged On Fine Embroidery

Thirty-five needlewomen have been chosen by Lady Smith-Dorrien, principal of the Royal School of Needlework, for the Coronation work which will be carried out at the school during the next three months. They will be engaged mainly on fine embroidery work on the canopy to be held over the King and Queen during the anointing, on the King's robe, and probably on the Queen's dress and train.

The King's robe will be that which was made at the school in 1902 for King Edward VII, and it is to be sent to the school shortly to be thoroughly examined, and repaired if necessary. It is of cloth of gold, embroidered all over with colored emblems—red Tudor roses, green shamrocks, purple thistles and silver eagles.

The canopy will be made entirely at the school, of cloth of gold, with 18 raised silver eagles round the border. It will be lined with rich white satin, and supported at each corner by four slender silver poles.

The Queen's dress will be made of white satin and will be embroidered all over in white and gold. Designs for the embroidery of the dress include Dominion and Colonial emblems.—London Times.

Yacht Will Cost Million

Challenger For America's Cup Is Building Luxurious Craft

The most luxurious yacht believed ever to have been built for a private owner will soon be launched for T. O. M. Sopwith, aircraft millionaire and challenger for the America's cup. It is his 10th yacht in 10 years and will cost him \$1,000,000, bringing his total outlay for yachts to \$5,000,000.

Guests will fare well, with accommodation for 50, and such extra equipment as a tile-lined swimming pool, a gymnasium, a hospital, a ballroom and a cocktail bar. Some cabins will be decorated in modern style, some in period. There will be golf practice nets and sliding panels of sun ray glass on the promenade deck.

America's first insurance company was organized in 1735 at Charleston, S.C. A fire in 1740 destroyed half of Charleston and ruined the company.

ITCH

STOPPED IN A MINUTE . . . Are you tormented with the itching tortures of eczema, rash, athlete's foot, eruptions, or other skin afflictions? For quick and happy relief, use cooling, antiseptic, liquid D. D. D. Prescription. Its gentle oils soothe the irritated skin. Clear, greaseless and stainless—dries fast. Stops the most intense itching instantly. A 35c trial bottle, at drug stores, proves it—or money back.

DICK GETS A NEW PARTNER

Of course, children should never drink tea or coffee. But do you realize that the caffeine in tea and coffee disagrees with many grown-ups, too? If you are bothered by headaches or indigestion, or find it difficult to sleep soundly . . . caffeine may be to blame. Why not try Postum for 30 days? Postum contains no caffeine. It is simply whole wheat and bran, roasted and slightly sweetened. It is easy to make, and costs less than one-half cent a cup. It's a delicious drink, too . . . and may prove a real help.

FREE! Let us send you your first week's supply of Postum free! Simply write Consumer Service Dept., 101, General Foods Limited, Cobourg, Ontario.

New Regulations Effective

Restrictions Placed On Germany's Restaurants Under Nazi Plan

Fewer dishes on the bill of fare, fewer table cloths in restaurants, and therefore less laundry, are some of the new measures to help Germany become self-sufficient in her food and raw material supply under the new four-year plan.

This was announced at the hotel and restaurant proprietors' meeting at Hanover recently. The new regulations became effective with the advent of the new year.

No bill of fare, even in the most expensive restaurants, is permitted to offer more than four different soups, 10 "dishes of the day," 10 fried or grilled dishes, six egg dishes, six different kinds of cold and four kinds of warm hors d'oeuvre, or 15 cold dishes such as cold cut, various special salads and cold fish.

Ordinary salads, vegetables, game and poultry may only be offered according to season. No stipulations have been made regarding cheese and dessert. Hot fish is the only major dish not subject to any restrictions, as the consumption of fish is to be encouraged.

Menus of the larger restaurants may offer no more than six major dishes, of which two must be fish, while menus of medium-sized restaurants may offer no more than three dishes, of which one must be fish.

Restaurant tables having marble or wooden tops, which can be cleaned, are not to be covered by table cloths. Saving can be made in laundry, it is said, without impairing either cleanliness or hygiene.

Cutlery, crockery and kitchen utensils in new restaurants are to consist of glass, porcelain or metals which are easily obtainable, in order to save silver, nickel and copper.

Industry For Alberta

News that Utah interests are planning a woollen mill for Magrath is further evidence that Southern Alberta is developing industrially in the direction of those industries for which it is best suited, states the Lethbridge Herald. A woollen mill in the centre of a district which produces 2,500,000 pounds of wool annually, and in an area where woollen clothing is a vital necessity of the residents, sounds logical.

A column of air one mile square extending from 50 feet to 14,000 feet above the earth contains, on an average for all seasons, about 25,000,000 insects.

Must Be Competition

Government Order Regulates The Sale Of Militia Horses

The government will tolerate no combinations in restraint of trade, nor secret covenants made to restrict free competition—even in the sale of militia horses. From time to time the noble steeds are found unfit for further service, or, for other reasons, have to be sold. In any case, the national defence department will see that fair's fair.

General order No. 2, tabled in the House of Commons by Ian Mackenzie, minister of national defence, makes this clear. It set forth that when one of these chargers has to be sold the sale has to be done by auction, and the C.O. of the regiment promoting the sale "will detail an officer to attend."

The reason is clear. The G.O. 2 continues that it will be the duty of this officer "to see that no combination exists to keep down the price. If such combination is apparent he will, after consultation with the auctioneer, postpone the sale."

The auctioneer gets a \$5 fee if the sale price is \$100, and five per cent. if over. However, there might not be much in it for the auctioneer because, says the order, he "will pay for all the advertising."

Free Scholarship

Canadian Pacific Railway Offers Free Tuition To Apprentices

One free scholarship to the faculty of engineering or faculty of arts and science at McGill University is being offered by the Canadian Pacific Railway, subject to competitive examination, to apprentices and other male employees under 21 years of age, enrolled on the permanent staff of the company, and to minor sons of employees. The company maintains 10 scholarships at McGill, the new one being to fill a vacancy resulting from the graduation of a previous winner.

Free tuition will be given as follows: Faculty of engineering; chemical, civil, mechanical, or electrical engineering, four years' tuition on senior matriculation, or five years' tuition (including one year in the faculty of arts and science) on junior matriculation; architecture, five years' tuition in the school of architecture, faculty of arts and science; four years' tuition in the arts division, or the school of commerce.

Physician: "Spinach is not an essential item of food. Anyone can live just as well without it."

Editor: "Anyone but a humorist."

Little Helps For This Week

Remember O Lord Thy tender mercies and Thy loving-kindnesses, for they have ever been of old. Psalm 25:6.

My Father I see and trust. The faithfulness displayed of old, I trust the love that never can grow cold; I trust in Thee.

Be not so much discouraged in the sight of what is yet to be done, as comforted in His good-will towards thee. It is true He has chastened thee with rods of sore afflictions, but did He ever take away his loving-kindness from thee, or did His faithfulness ever fail thee in the darkest night that ever befell thee? We call Him the God of our fathers, and we feel there is some stability at centre when we can tell our cares to One listening at our right hand and by whom their cares have been remembered and removed.

A Century-Old Pipe

A pipe 125 years old and carved; out of three sections of elk's horn, was found hidden in the crotch of the branches of an old tree cut down on a Yarmouth township farm, near Port Stanley, Ontario. The letters "J. Hall, 1811," are carved on the pipe.

The bankers of New York City were the first employees to go on strike in America. The strike occurred in 1741. In those early days strikers were treated as conspirators but convictions seldom were obtained.

Surplus output has reduced the price of shoes in Brazil.

LAME BACK

Gin Pills give prompt relief from backache resulting from deranged kidneys. They soothe and heal irritated tissues and assist the kidneys in their function of eliminating poisonous waste matter from the system.

DALY HARDWARE
Telephone 180 Abbotsford

Abbotsford Football Team Beats Richmond Squad 5-3

Defeating the Richmond team 5 goals to 3 in Vancouver last Saturday, Abbotsford soccer squad climbed to fourth place in the G.V.A.A. football league, and thus entered the playoffs between the top four teams in the league.

Abbotsford found the turf surface to their liking, and took an early lead when W. Johnson scored nicely after a pass from the right wing. Abbotsford were two up shortly after, Plover right converting a penalty shot awarded when one of the Richmond team's defense men handled the ball.

The home team replied with a goal scored on a hard shot that the Abbotsford goalie, Haines, deflected on against the upright, only to have the ball bounce back against him and then over the line. Plover right scored again for the locals, and not long before half time Ralston made the score 4-1, with a nice snap shot.

In the second half, both teams slowed down, with Richmond taking the offensive. Johnson tallied once more for Abbotsford, while Richmond scored twice, once on a hard, high drive and the other on a penalty shot. Abbotsford were not at their full strength, but played very well, considering the long lay-off. Haines, in goal, made several nice saves, while Godson, normally outside-left, played an excellent game at full back.

The Abbotsford team have a tough nut to crack next Saturday, when they meet Hammond on the Jubilee grounds. The visitors are a strong team, and will give the local boys a fast hard game.

UNITE AGAINST WAR

Editor News:
It is nearly 23 years since that fateful and sorrowful day when the printing presses ran hot, and hourly editions were issued. Paper boys ran hither and yon in frenzied fashion with the exciting news, "War is declared with Germany." Now, after these eventful years following the great massacre, we have on our hands 50,000 victims of that war, who are in dire need and distress.

Does that mean anything to the majority of us? It should. That fact alone should be ample warning to all progressive people to protest and protest vigorously against the alarming armament appropriation mooted by the present government, and the menacing indication of another massacre.

\$35,000,000 for Canadians to spend on slaughter! England spending half a billion sterling on armaments, still she, like all other countries, is still struggling with her last war debt. Every country arming as they have never done before—and our unemployed increasing in numbers each year.

Soon they will come, with their bands playing a stepping march, with a military, lilting rhythm, their victims in uniforms of khaki and gold braid, clean and spic and span (for they have not yet entered the fray)—shouting in an almost imbecile condition of mind, all done under the misnamed spirit of Patriotism. All this we who have suffered know.

Note our military unemployment camps, our gymnasium classes for men, recently organized. Have they not significant doctrines underlying them? The height, weight and general description of the youths, and the monthly progress made, if any, all duly catalogued in triplicate, and filed at Victoria.

England was alarmed last year when she found that 50% of her population was unfit, or in the C grade; evidently our government is taking cognizance of that fact.

Our present laws compel us to punish any person who is guilty of criminal assault or murder, and ostracize them from society, yet we are training our youths, under the misnomer of patriotism, to destroy each other through the instrumentality of gasses and bombs, and to look upon the massacre of millions of people as a glorious and valiant deed. It would seem that after all, we have not progressed so very far from Neolithic times.

Man is the maker of war, and always has been, and unless we women both singly and collectively, vigorously protest, we shall have the dark Devil of War cursing man's earth again. By co-operation and unity the mothers of the world can become the strongest force in creation. Did a woman not exercise dominance over Adam in Eden?

Not now are we going to be deprived of every right we have earned. So I would like to suggest to all women's organizations in this district to send in resolutions, both individually and collectively, to the Federal member, to Premier McKenzie King, and to Hon. R. B. Bennett, leader of the opposition, demanding their support of resolutions to conscript the nickel, industry, and all industrial plants now engaged in the manufacture of war materials. The passing of legislation that would make it a criminal offence for any individual company or corporation to make a profit out of munitions of war. These and many other like resolutions could be endorsed by local organizations and forwarded to the Prime Minister.

LIBRARY NOTES

Young Walter Scott—Elizabeth Janet Gray.

The story of Sir Walter Scott's boyhood.

Mary Poppins—P. L. Travers.
"Mary Poppins" and Mary Poppins Comes Back" are the very amusing adventures of four children and their most unusual nurse, Mary Poppins.

Ballet Shoes—Noel Streatfeild.
Pauline, Petrova and Posy Fossil are not really sisters, but they have been brought up together like one family. The story tells of their adventures at the academy of dancing and stage training.

The Sword of the Wilderness—Elizabeth Coatsworth.
Early on an August morning in 1689 Seth Hubbard was captured by the Indians. After the first harrowing experiences he finds life with them an interesting one.

Flag of the Desert—Herbert Best
An exciting adventure story of Western Africa.

"Whistler's Van"—Idwal Jones.
Following a gypsy caravan over the wild moorland of Wales—sleeping under the stars with the Romany company—learning the strange passwords and the tradition-bound customs of a picturesque nomad race, that is the life that Gwilym learns when he dares to follow the Whistler's van in search of his grandfather.

Arrange your
Easter visit
by
'Long Distance'

Going away for Easter? If so, you will find it advantageous to make your arrangements in advance by long-distance telephone. Important advance information can be obtained in this way. In one telephone conversation you can ask questions, receive replies, and, if you wish, make reservations.

If you intend to visit friends or relatives, a pleasant telephone chat in advance will add to the joys of the reunion to follow.
